

The CFBS Lesson

1. RECAP

A 5 minute DO NOW that recaps last lesson's learning and/or prior knowledge that helps to contextualise new content.

2. PRESENT

Present new knowledge. This might be through a guided reading in the workbook, modelling, exposition etc.

3. CONSOLIDATE

Comprehension activities in workbooks are completed to check that all students understand. These are 'chunked' through the teaching portion of the lesson e.g. questions under each paragraph in a reading or questions asked at intervals during an experiment. Teachers will ensure all students understand the new content before moving onto application.

4. APPLY

Students independently apply what they have learnt after the teacher has modelled this application.

5. REVIEW

Review of core content e.g. a short fact test, paragraph or a diagram.
