RECONSTRUCTION

This is an opportunity for 15 state school students (age 15-18). This after school club is part of STORE STORE BUILD, a small scale building project run as a series of free after school clubs in architecture, engineering, urban ecology and construction.

Join us for a free One-Day Workshop run by Flimsy Studio. The workshop is part of a series exploring non-destructive design and transformation.

Students will assemble a structure out of recycled material. They will learn new skills such as furniture building, zero-waste design, reclaiming materials and reconstruction.
